# Jessie Scheller's Learning Diary

Questions to ask:
What aspects of these tasks were most difficult for you and why?
If you had to do the tasks againm what would you do differently, and why?
How did your previous experience help and/or hinder you in completing the tasks?
What was the most surprising thing that you learned?
What was the most useful thing that you learned?
What did you learn about yourself as a result of completing these tasks?

Unit 0:
Good Day Fellow COMP 266 Students,

   My name is Jessie Scheller and I am a retired Canadian Army veteran currently enrolled in the BSc CIS program through AU. This is my second semester of schooling and my first course that envolves actual coding. I began learning python in my free time prior to beginning my schooling so I am hoping some of the principles/concepts I learned will come in helpful during this course. I am excited to start learning the course material and I am hoping that I get a chance to engage with fellow students.

   I will be creating this website for a family member that is an eyelash technician and will be using it after the course is completed. I will keep it live (work in progess) here and can post to SCIS when the service is available. I have also set up a Github page for this course where I will track/edit learning diary entries, unit activity mapping, end-unit website ver., and other course material.

Thank you for your time and have a great day!

Jessie
